Experience

Software Engineer
Expensify.com
2011-present

I was an early developer at this SAAS Expense Reporting startup. I worked on both the **PHP** backend (bank integrations, a **mechanical turk** system, html receipt parsing, among other things) and the heavy **JS** frontend (tiered feature-sets, report permissions, dropbox integration).

Web Developer
RIT School of Film and Animation
2008-2011

I was the primary developer for a db-driven site for film students to organize their projects. This was in **PHP + MySQL + CodeIgnitor**. I worked on this through a successfull launch and subsequent maintenance while I was taking classes.

Co-op Dev (6 months)
Parse3
2008

Taught myself C# and ASP on 2- and 5- person teams. Worked on the frontent and Sitecore-integrated backend for https://kumon.com.

Misc

6 mo Co-op @ IBM, 2009 - Javascript + Dojo
6 mo Co-op @ GE MDS, 2008 - Java
Tier 2 Tech Support 2006-2008 - Mac + Windows

Projects

Vimbits.com
Github.com/kkuchta/vimbits

A Rails site for trading snippets of Vim configuration I did to scratch my own itch. Browse 'top', 'hot', 'new', and 'random' vimrc snippets. Has user account, tags, code highlighting.

Ubimenu.com

A hosted-menu service for restaurants I worked on with a friend. Also Rails, though I did mostly frontend work.

Kodak Collage

6-month senior project at RIT working with Kodak with a 5-person team. A Facebook app for creating collages from existing photos. C#, Rails, JS

Other Projects

SFRentalApp.com, a JS Physic Engine, an infinit-scrolling random Imgur wall, a social-media campaign manager, a crime-rate service called "Danger Zone"

Education

BS in Software Engineering, 2011

Other Interests

Homebrewing, Photography, Travel, Karate
